JERICO ROAD
COMMUNITY HEALTH CENTER

MEDICAL SERVICES

PRIMARY CARE

Our doctors, nurse practitioners, and physician assistants provide the following:

- Routine individual/family care
- Children’s healthcare
- Women’s healthcare
- Maternity care
- Medical imaging (through a partnership with WNY Breast Health and WNY Imaging)

SPECIAL DISTINCTIONS

Jericho Road Community Health Center is a Federally Qualified Health Center (FQHC). We are also a Patient-Centered Medical Home and we have achieved the highest level of recognition (Level 3) through the National Committee for Quality Assurance (NCQA).

SPECIALIZED MEDICAL SERVICES

Jericho Road also provides a suite of other targeted healthcare programs, in order to best serve our patients and grow a healthy Buffalo community.

Our care coordination department consists of three teams that promote the self-sufficiency of individuals and families with medical and social barriers.

The care management team serves adult and pediatric patients who have multiple chronic conditions and who require an additional level of care, support, and education to meet their needs and goals. This team operates our Adult Health Home, Children’s Health Home, and Adult and Children’s Non-Health Home Programs.

The diabetes education and support team assists diabetic patients in understanding and managing their specific health needs through individual and group education, a nutrition program, a continuous glucose monitoring clinic, and an Advocates for Diabetes program.

Pharmacy services are multifaceted at Jericho Road:

Pharmacy consultation ensures that patients are educated on their medications, including what the side effects are (and how side effects differ from drug allergies) and how to properly take them. Medipacks (pictured below) are used for patients with low-English literacy to promote compliance.

Medication assistance (prescription fulfillment) is available to patients, often at a reduced rate.

Prescription delivery is available to patients who lack access to transportation and/ or have mobility issues.

OTHER WELLNESS SERVICES

Behavioral health care supports individuals as they strive for mental and emotional wellness. Jericho Road provides in-house counseling for patients suffering from PTSD, anxiety, depression, drug and alcohol addiction, dissociative disorders, and other issues.

Jericho Road **Family Dental** provides full-spectrum all-ages dental care for the whole family.

The Independent Health Gym and Wellness Center at Jericho Road provides physical therapy, fitness classes, and personalized nutrition and exercise programming. Facilitated health insurance en-rollers help uninsured patients navigate the health insurance landscape and apply for coverage if they would like it.

In-house interpreters are available to interpret for patients who do not speak any English or simply feel more comfortable communicating in a language other than English. Our interpreting team speaks over 15 languages.

Spiritual care is a client-directed approach to cultivating individual spiritual wellbeing. Our spiritual care team is available to listen to and pray with clients who would like to develop their relationships with others, with themselves, and with God. No one is required to utilize this service.
